

Organizing

- **To achieve integrated acquisition of knowledge, skills, and positive attitude toward organizing.**

OBJECTIVE

TEXTSTUDIO

- At the end of this lecture, all participants will be able to:
- Identify organizing, organization and organizing process.
- Steps in the process of organizing.
- Discuss Importance of organizing.
- List principles of organizing.
- Apply organizing as per nursing manager role.

outline

- **key concepts.**
- **Importance of organizing**
- **Steps in the process of organizing.**
- **principles of organizing:**
 - **Chain of command.**
 - **Unity of command.**
 - **Span of control.**
 - **Delegation of authority.**
 - **Departmentalization.**
 - **Specialization.**
- **Delegation.**
- **Role of the nurse manager in organizing.**

Definitions: -

- **Organizing:** is the process of determining the activities to be performed, arranging these activities to administrative units, as well as assigning managerial authority and responsibilities to people employed in the organization.
- **Organizing:** is the process of deciding the necessary levels of organization needed to accomplish the objectives of a nursing division, department, or service and unit.

Definitions: -

- **Organizing process:** refers to identifying and grouping of activities to be performed, defining and delegating authority, casting responsibility and establishing relationships to enable people to work together effectively in accomplishing objectives.

Importance of organizing:

- **Focus on objectives and facilitate the attaining of objectives.**
- **Arrangement of positions and jobs within the hierarchy.**
- **Clearly define responsibilities and line of authority of all levels.**
- **Creating relationships that will minimize friction.**

Steps in the process of organizing:

- The process of organizing consists of the following steps:

1. Determining the activities to be performed to achieve the objectives of the organization.
2. Identification of major functions to which these activities relate.
3. Grouping and sub-dividing the activities within each function on the basis of similarity or relatedness.
4. Establishing relationship among individuals and groups.

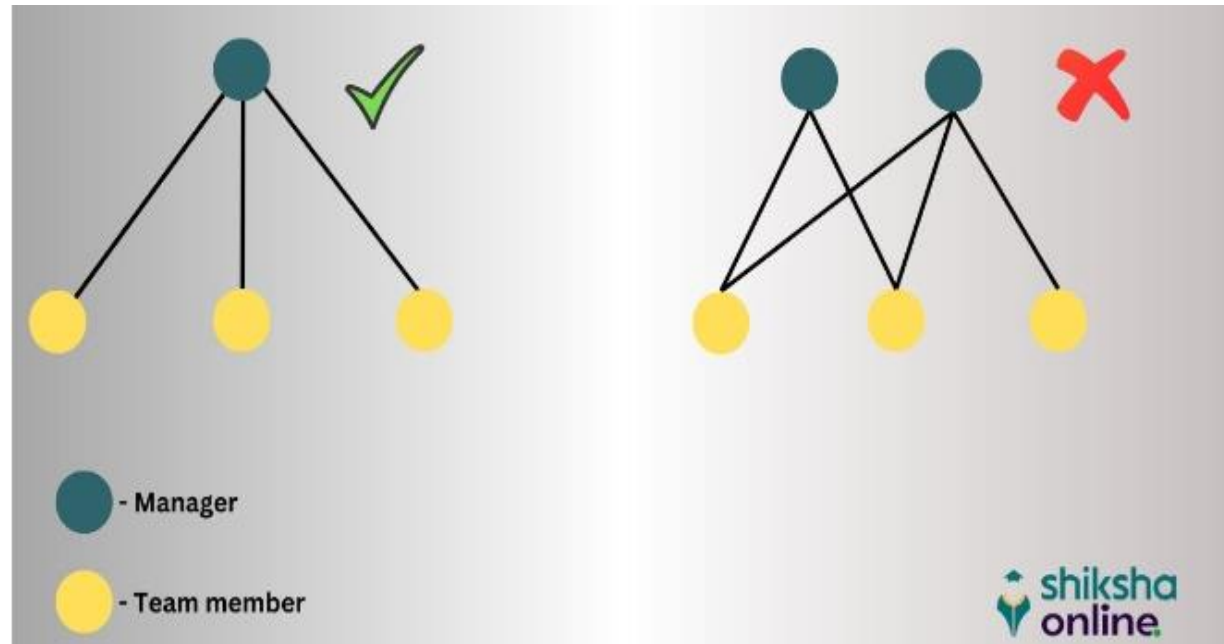

Principles of organizing: -

- 1. Chain of command.**
- 2. Unity of command.**
- 3. Span of control.**
- 4. Delegation of authority.**
- 5. Departmentalization.**
- 6. Specialization.**

Cont.

1-Chain of command: the formal path of communication and authority.

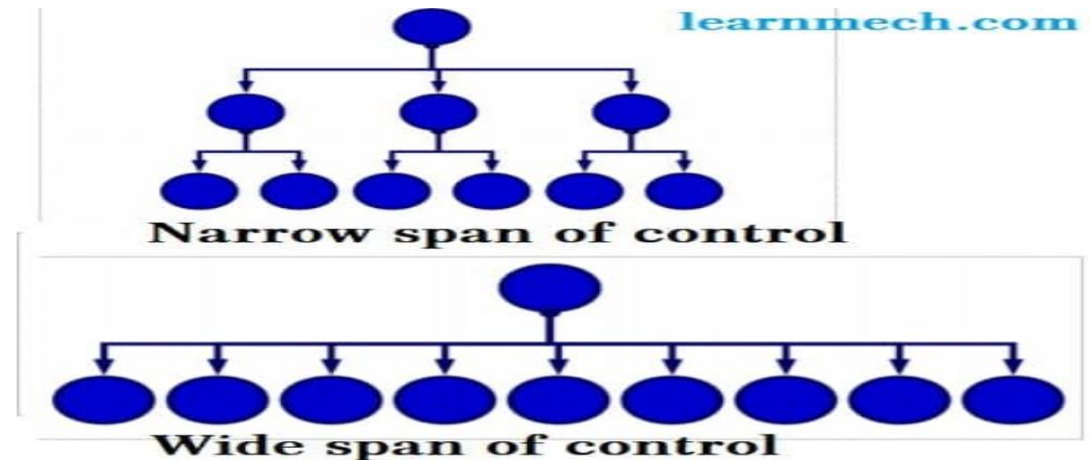

2-Unity of command: One person/one boss, each person has one manager to whom they are responsible.

Cont.

3-Span of control: also known as span of authority, span of supervision, or span of management.

- **This concept deals with the scope of supervision, the number of subordinates that can be adequately supervised by one supervisor.**

Cont.

- **Dimensions of span of control**

- A. Narrow span of control:**

In which the manager supervises a small number of workers.

- B. Wide span of control:**

The manager supervises a large number of workers.

Cont. Principles of organizing: -

4-Delegation of authority:

- **Delegation:** is the process of assigning work from a top organizational level to a lower one or from superior to subordinate and giving that person the authority to accomplish them.

Delegation process:

- 1. The allocation of duties.**
- 2. The delegation of authority.**
- 3. The assignment of responsibility.**
- 4. Creation of accountability, i.e., subordinates must be held answerable to properly carry out their duties.**

Main principles of delegation:

- **Responsibility cannot be delegated.**
- **Authority and responsibility should be in equal proportion.**

Factors affecting authority is delegation:

There are many factors that the manager should consider when he/she decide to delegate:

- A. Organization's size:**
- B. Importance of duty or decision:**
- C. Task complexity:**
- D. Qualities of subordinates:**

Authority:

- Is the right to take final decisions, to act or to command action of others. It moves in a downward direction.
- **Types of authority:**
- **A. Ultimate authority:**
- **B. Legal authority:**
- **C. Technical authority:**
- **D. Operational authority:**

Cont.

A. Ultimate authority:

It deals with the original source from which one derives the right to take actions. Thus, in the health sector, the ministry of health has ultimate authority.

B. Legal authority:

Means that an individual is legally permitted by the virtue of the position to take an action; a hospital director delegates to director of nursing service to act on behalf of the department.

C. Technical authority:

It refers to a person who is a recognized expert in some particular field. This does not necessarily mean that it is derived from position.

D. Operational authority:

Is giving someone permission to assure certain responsibilities through delegation of authority.

Cont. Principles of organizing: -

- **Departmentation:**
- It is the process of grouping activities into administrative units.

Types of Departmentation:

- 1. Departmentation by services: i.e. medical, surgical**
- 2. Departmentation by time: twenty-four hours a day**
- 3. Departmentation by degree of acuteness of illness of the patients: i.e. Intensive Care Unit, Intermediate Care Unit,**
- 4. Departmentation by function: e.g. laundry, pharmacy, dietary services.**
- 5. Departmentation by location: , i.e. inpatient department, outpatient department**
- 6. Departmentation by patient: i.e. sex: male, female, age: geriatric, pediatric, economic status: paying, free unit.**

Cont. Principles of organizing: -

- **Specialization:**
- The principle of specialization is that person should perform a single leading function. Thus, there is a division of labor, differentiation among kinds and duties.
